To Quatro Air Systems

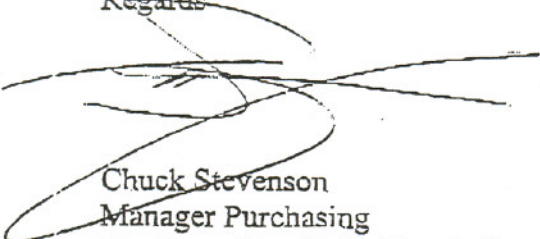

On behalf of Markham Stouffville Hospital I would like to express our gratitude, for your contribution in helping us contain the SARS outbreak in our hospital and ultimately in Toronto.

It is comforting to know that this type of filtration expertise exists in Canada and we were pleased to have placed an order for seven (7) HEPA filtration systems from your company. You responded immediately to our needs, that allowed us to create an instant isolation environment, to contain anyone suspected of having the virus.

You were a key component in our plan to respond immediately to an unknown situation and for that we are grateful. The systems themselves are quite functional and were easy to install, easy to operate, very quiet and look like they belong in a hospital.

Should you require any of information in the future I would be more than happy to be of assistance. Thank you once again for your help.

Regards

Chuck Stevenson
