To Whom It May Concern:

This is to confirm that Sunnybrook & Women's College Health Sciences Centre has purchased 32 fresh air purification units from Quatro Air Technologies Inc., in Kirkland, Quebec, Canada. The units purchased are models AF500 and AF2000 complete with 99.97% efficiency HEPA filters.

We have used these units throughout our SARS crisis and they have worked very satisfactorily for us. The units themselves appear to be well made and quite functional for the environment in which we are using them.

If you require any further information, please do not hesitate to contact me.

Sincerely,

Harry Taylor
Director, Facilities Services
